PROFILE

Final-year electrical engineering student and founder of **FOTSO COMPANY**, an open quantitative audit practice for trading strategies. Specialized in statistical evaluation of algorithmic trading systems — backtest pathology detection, walk-forward validation, out-of-sample testing. Public methodology emphasizing rigor, transparency, and anti-overfit discipline. Operating solo with a multi-specialist agent-orchestrated workflow.

EXPERIENCE

Founder & Lead Researcher Feb 2026 — Present

FOTSO COMPANY

Remote · Cameroon

- ▶ Built an end-to-end audit framework for MetaTrader Expert Advisors, trading journals, signal services, and copy-trading strategies — methodology, deliverables, pricing, public landing page
- ▶ Published **first public audit case study** (GOLD-PIP MINER EA V4) demonstrating a 77% win rate / 100% drawdown trap — shared on Reddit (r/algotrading, r/IndiaAlgoTrading) and Telegram (780+ member EA community)
- ▶ Designed and tested a multi-version proprietary Expert Advisor (**FotsoCerveauAdaptatif**): 6 instruments supported (XAU/USD, EUR/USD, US30, NAS100, BTC, GBP/USD), adaptive memory architecture, integration of 5 ONNX ML models, audit-validated regime filters
- ▶ Validated v6.0 with Sharpe OOS 0.88, max drawdown 3-5%, profit factor 1.16 across 4.25 years of XAU/USD M15 data
- ▶ Maintain a **public repository** documenting methodology, design decisions, successes and failures — including transparent post-mortem of v5.6 overfit demystification and v5.91 archival

Independent Quantitative Research Feb 2026 — Present

Self-directed practice

- ▶ 4-month intensive practice in systematic trading: data pipeline, backtesting, statistical validation, deployment risk assessment
- ▶ Built Python pipeline for backtest report parsing (.xlsx) with 38+ analysis scripts, automated metric extraction, anomaly detection
- ▶ Documented full strategy lifecycle: hypothesis → backtest → audit → verdict → archive — published as study material

EDUCATION

Institut Supérieur de Management et de l'Entrepreneuriat (IME) · **Electrical Engineering — Year 3 (Engineering Degree, in progress)**

Douala, Cameroon · 2024 — 2027 (expected)

SKILLS

Quantitative & Statistical Statistical audit (Sharpe, Sortino, Profit Factor, Z-Score, Recovery Factor), walk-forward validation, out-of-sample testing, Monte Carlo bootstrap, regime detection, anti-overfit methodology

Programming Python (pandas, scikit-learn, ONNX runtime, openpyxl, matplotlib), MQL5 / MQL4 (Expert Advisor development, optimization, multi-symbol architecture)

Trading & Markets	MetaTrader 5 (Strategy Tester, Strategy Provider setup), backtest report analysis, brokerage execution evaluation, copy trading infrastructure
Engineering & Tools	Git/GitHub workflow, technical documentation (Markdown), HTML/CSS, WeasyPrint, agent-based orchestration
Soft Skills	Public technical writing, transparent failure reporting, autonomous project ownership, end-to-end delivery
Languages	French (native), English (professional working proficiency)

PUBLIC CONTRIBUTIONS

- ▶ Published statistical audits of EA backtests on Reddit (r/algotrading, r/IndiaAlgoTrading, r/francetrading)
- ▶ Open methodology repository — every project decision, failure, and lesson documented and version-controlled
- ▶ Active participation in international algo-trading communities — technical contributions, audit feedback, methodology discussion

FOTSO COMPANY — Quant · Audit · Research. Anti-overfit. Anti-gourou. Data first.
